SOFTWARE DEVELOPMENT PROJECT EXPERIENCE

GitHub: <https://TreyCrumrine..github.io>

We Can Code IT

2023

Planned, designed, and Interactive applications in collaborative, team-based, and independent settings demonstrating the proficiency to earn Software Development Certificate.

Virtual Pet

- Technologies used: C#
- Designed Virtual Pet that user can feed, play with, take to the vet, and interact with other pets.
- Enabled users to add pets to shelter and/or remove pets. And interact with multiple pets at once.

Class of Choice

- Technologies used: C#
- Designed a class for Football Players giving users the ability to create their own.
- Enabled users to select number, position, name, conference they wanted to play in or create their own team.

Computational thinking assignment

- Technologies used: C#
- Designed methods to determine answers to problems that users have prompted to them
- Enabled users to find out whether their nmbe ris even or add, if it is divisible by certain numbers, and even discover certain things about words they entered.
